Profile

Associate Software Engineer with hands-on experience building and maintaining production-grade web and mobile applications for a healthcare technology company. Resolved 30+ production issues, shipped features end-to-end from requirements through deployment, and built CI/CD pipelines with automated code security scanning using SonarQube and Checkmarx.

Experience

ResMed India Pvt Ltd *Bangalore, India*

Associate Software Engineer **May 2025 - Present**

- Resolved 30+ production issues in live healthcare applications, performing root-cause analysis and deploying fixes to ensure system stability and minimal disruption to end users.
- Owned new feature development end-to-end, from requirement analysis and design through implementation and deployment, delivering production-ready code independently.
- Architected and built 2+ new features from scratch, including system architecture design, SQL stored procedure design, and Hangfire-based background job scheduling, with integration to deliver data to the mobile application.
- Built a new application from scratch, contributing across components, UI design and implementation, and backend engineering to deliver a complete, production-ready solution.
- Partnered with product, QA, and engineering stakeholders to align on requirements and streamline release handoffs, contributing to on-time delivery across multiple release cycles.

Software Development Engineer - Intern **July 2024 - May 2025**

- Contributed to MAUI-based mobile app development, implementing UI components and enhancing cross-platform compatibility across Android and iOS.
- Developed a Fall Risk Prediction application, integrating an existing machine learning model to predict patient fall probability during internal testing.

Morningwind Technologies *Mangalore, India*

Software Developer - Intern **Oct 2022 - May 2024**

- Led a 4-person development team, overseeing end-to-end development of 20+ client projects, handling everything from requirement gathering and coding to deployment and post-launch maintenance.
- Communicated directly with clients to gather requirements and recommend improvements, reducing change requests through upfront solution planning.
- Handled bug tracking, debugging, and feature enhancements independently, improving application stability and reliability.
- Balanced frontend and backend development responsibilities, demonstrating adaptability and strong project ownership.

Projects

- **Nexo** - Offline-first delivery management app enabling daily stock loading and on-the-go sales recording without connectivity. Syncs to a web dashboard on restoration, generating end-of-day sales reports and real-time inventory summaries for field sales teams.
- **Multi-Branch Billing System** - Centralized platform for branch-wise billing and invoicing, reducing manual reconciliation across multiple branch locations.
- **Scholarship Management Portal** - Web portal for managing scholarship applications and tracking, supporting 10000+ users.
- **News Application** - Flutter app for publishing news articles with categorized feeds, image support, and real-time updates.
- **Election App** - React-based web app enabling secure online elections for the MCA Department, NMAMIT.

Education

Master of Computer Applications **2023 - 2025**

NMAMIT - Nitte, India *CGPA: 9.2*

Bachelor of Computer Applications **2019 - 2022**

Sacred Heart College - Madanthyar, India *CGPA: 8.2*

Skills and Other Information

- **Programming Languages:** Java, C#, JavaScript, C
- **Frameworks & Platforms:** .NET, .NET MAUI, Blazor, React, Node.js, Express, Spring Boot, Hangfire
- **Frontend & Web:** HTML, CSS, XAML, Bootstrap, Tailwind, PHP
- **Databases:** SQL Server, T-SQL, Stored Procedures
- **Tools & Practices:** Notion, Rider, VS Code, SSMS (SQL Server Management Studio), Git, Postman, Azure, CI/CD Pipelines, SonarQube, Checkmarx
- **Soft Skills:** Team & Stakeholder Management, Decision Making, Leadership, Communication, Presentation
- **Certifications:** Google Project Management, Agile Fundamentals, Flutter
